Ms. Nicole Briand, Town Manager (Via Email)
Town of Bowdoinham
13 School Street
Bowdoinham, Maine 04008

Subject: Bowdoinham Public Works Facility #16018
Bowdoinham, Maine

Dear Nicole:

Pine Tree Engineering is pleased to submit this proposal for site design revisions at the Public Works Facility on Pond Road. The site will be expanded for more storage space, but it will be designed to keep the impervious surface below 3 acres in order to avoid a Department of Environmental Protection (DEP) Site Location of Development Act permit. The existing DEP Stormwater Permit will be amended to allow for the additional impervious surface.

We propose to complete the following scope of services:

<u>Task</u>	<u>Description</u>
1	Preparation of Existing Conditions Plan
2	Complete Stormwater System Design
3	Preparation of Proposed Site Plan
4	Review with Town Staff
5	Prepare DEP Stormwater Application
6	Prepare Planning Board Application
7	Attend Planning Board Meeting

Pine Tree Engineering proposes to complete the above scope of services for a lump sum fee of **\$17,000**. This fee may be subject to change due to unforeseen circumstances and due to delays in completing the work, outside our control. This fee does not include permit application, or advertisement fees. Please sign, date, and return a copy of this letter as authorization to proceed.

Ms. Nicole Briand, Town Manager
