

## Sign Design Plans

### Dimensions:

Overall Height: 6 feet

Overall Width: 6 feet

Post Dimensions: 4x4 inches

### Materials:

Sign Face: High-density polyethylene (HDPE) or aluminum for durability and weather resistance.

Posts: Pressure-treated wood or metal (painted or powder-coated for durability).

### 1. Sign Structure

#### a. Sign Face:

Size: 5 feet x 4 feet (leaving a 6-inch border around the edge for a framing effect).

#### Material Options:

HDPE: Lightweight, durable, and can be easily engraved or printed.

Aluminum: Robust, rust-resistant, and can be powder-coated for a sleek finish.

#### b. Posts:

Size: 4x4 inches

Material Options: Pressure-treated wood or metal.

Height: Posts should extend 6 feet above the ground, with 2 feet buried for stability.

Color/Finish: Paint or stain to complement the sign and overall aesthetic of the complex.

#### c. Mounting:

Posts should be anchored in concrete footings to ensure stability.

Use heavy-duty brackets or metal mounts to secure the sign face to the posts.

### 2. Design Elements

#### a. Sign Layout:

Background Color: Earthy tone or subtle gradient that complements the natural surroundings of Bowdoinham. Forest green

Text Color: Contrasting color for readability. gold,

#### b. Text:

Font Style: Serif font that reflects a modern yet classic feel.

Text Color: Gold

Size: Large enough to be easily readable from a distance. The name "Conifer Ridge" should be the focal point, with larger font size than any additional details. "Bowdoinham Maine" will be in a slightly smaller font below
