				service due to lack of funds. Some of our poorest citizens probably need the Barn the most I would like to know more about what gets recycled, how, at what cost to the town, and for what purposes. In a general briefly worded way I'm not looking for a yearly, lengthy document, but a monthly or quarterly chart, with a few comments. A longer yearly document might also be worthwhile, actually, but serves a different purpose. Regular brief updates might be motivating. Occasional in depth information might give us broader, longer-term perspective on what we're trying to do. I'm sure the answer change over time and I imagine some may be unattainable, but I often wonder as i sort recyclables, is this really getting recycled? Does it reduce the human carbon footprint to recycle it? Are there other benefits? What material
